

Report for the
3rd Quarter 2018

SINOWO

Interim Group Management Report of SKW Stahl-Metallurgie Holding AG from December 1, 2017 to August 31, 2018

1. General economic conditions

Self-administered insolvency proceedings were opened for the parent company of the SKW Stahl-Metallurgie Holding AG Group on December 1, 2017. In accordance with German law, financial year 2017 ended on November 30, 2017 due to the opening of insolvency proceedings on December 1, 2017 pursuant to Section 155 InsO. In accordance with the statutory regulations, it is a shortened financial year for purposes of the financial reporting of SKW Stahl-Metallurgie Holding AG. Therefore, the quarterly consolidated financial statements were prepared at the reporting date of February 28, 2018. Because the prior financial year 2017 was a shortened financial year (January 1 to November 30, 2017), the comparability of the corresponding statements is limited.

1.1. Strengthened recovery of the global economy predicted for 2018

In January, the International Monetary Fund (IMF) updated its forecasts (www.imf.org) by predicting that the global economy will grow at a rate of 3.7 % in 2018 equal to 2017. In October 2018, the outlook is one of less balanced and more tentative expansion than IMF hoped for last

April. Growth in the United States remains exceptionally robust for now, powered by a procyclical fiscal expansion that may, however, weigh on US and global growth later. But IMF have downgraded near-term growth prospects for the euro area, Korea, and the United Kingdom. The reassessment is more dramatic for emerging markets as a group, where they see growth easing in Latin America (notably Argentina, Brazil, Mexico), the Middle East (notably Iran), and emerging Europe (notably Turkey).

For the Eurozone, the IMF predicts growth of 2.0 % in 2018, slightly below the level of 2017, much faster economic growth of 2,9% is predicted for the US economy. The aggregate growth of all industrialized nations is estimated at 2.4 %.

Developing and emerging-market countries are expected to grow at a somewhat stronger rate of 4.7 % in 2018, with China's economic output expanding by 6.6 %, which would be appreciably slower than in the prior years. Whereas India can expect its economy to expand at the upwardly revised rate of 7,3%, growth of only 1.4 % is predicted for Brazil. Russia's

9. Declaration according to Par, 37w Sec, 5 WpHG

economic output is predicted to expand by only 1,7% in 2018, roughly the same as in 2017,

1.2. Global steel production still supported by worldwide economic growth in the reporting period

The SKW Metallurgie Group generates most of its revenues with customers in the steel industry; most revenues generated with other customer industries involve Quab specialty chemicals. The SKW Metallurgie Group offers its customers in the steel industry a broad portfolio of technologically advanced products and services, mainly for primary and secondary metallurgy. For most of these products, the quantities demanded by steel manufacturers are mainly dependent on the quantity of steel they produce. On the other hand, the price of steel is less directly important for the SKW Metallurgie Group because steel demand has little price elasticity in the short term, so that the effects of the steel price on production quantities are minor. However, the profit situation of steel manufacturers (which is also affected by the price of steel) can have indirect effects on the SKW Metallurgie Group. For example, customers facing profit pressure may increasingly demand changes in terms and conditions or the credit quality of receivables due from customers of the SKW Metallurgie Group could deteriorate,

According to the World Steel Association, demand in the global steel market increased by 4.4 % to 151,711 million tons in the first nine months of the reporting period, compared to the same period in the prior year. In the international steel markets, moreover, prices remained on a comparably high level as a result of anti-dumping measures in various regions and extremely volatile iron ore prices, which increased by approximately 20 % in the reporting period. The global steel industry is confronted with serious trade and adjustment problems, perhaps the gravest in its history. The rapid expansion of

production capacities in the last years has led to substantial shifts in global trade flows and an increase in protectionist measures. The G-20 heads of state and government assembled at the G-20 summit in Hangzhou in September 2016 recognized excess capacities in the steel industry and in other industries as a global problem that requires collective answers.

The import situation in the European market remains tense as declining steel imports from China have been replaced with disproportionately rising imports from other countries (Ukraine and even India), so that the import situation did not ease in terms of quantities in 2018. As a result of growing protectionism tendencies in the global steel industry, there is an additional risk of further trade diversions to the relatively open EU steel market. Despite the current worldwide uncertainties, the change of sentiment among both steel producers and steel processors is striking. Most enterprises consider their economic situation to be good. Rising prices for steel products since the beginning of the year have enabled steel manufacturers to increase their margins, which was urgently needed. Furthermore, the key indicators for the first three quarters of 2018 paint a positive picture in that crude steel production and market supply increased modestly.

China is still the world's largest producer by far, with a world market share of approximately 50%, as before. A large share of Chinese steel production cannot be sold permanently in the home market. Moreover, it has been shown in the past that it is not probable in the short term that Chinese production volumes can be appreciably and sustainably adapted to the reduced level of domestic demand. Consequently, large quantities of steel produced by Chinese surplus capacities are being offered and will be offered in the world market at low prices. The export pressure from China will only ease when actual production quantities are reduced or adapted better to local demand. Based on profitability and environmental concerns, experts believe that such a production quantity adjustment could take place in China in the medium term;

9. Declaration according to Par, 37wSec, 5WpHG

the heads of state and government of the 20 leading industrialized and developing nations (G-20) in August/September last year. In SKW's estimation, the steel being exported from China to Western countries is increasingly of good, competitive quality, therefore intensifying the price pressure on Western steel producers.

This growing pressure on Western steel makers leads in turn to rising price pressure on their suppliers, including the SKW Metallurgie Group. However, this situation also presents an opportunity for SKW to enhance the competitiveness of steel manufacturers with its higher-quality products.

Geographically, the SKW Metallurgie Group continues to focus on the sales markets of USA/North America (accounting for more than 50% of the Group's revenues in both the reporting year and the previous year), the European Union (primarily for the "Cored Wires" segment at the present time), and Brazil. The SKW Metallurgie Group currently has only a negligible value-added share of the steel produced in China.

The development of steel production in the main sales regions of the SKW Metallurgie Group was mixed in the reporting period:

- ➔ In the United States (including Canada), the key market for the SKW Metallurgie Group, steel production had stabilized on a low level by the end of the third quarter of 2016. Since this time, steel production has recovered in this region in terms of both production quantities and capacity utilization rates. Production in the first nine months of the reporting period rose by 7.4 % from the level of the prior-year comparison period. In addition to expectations for fiscal policy measures such as tax cuts, public-sector investments, etc., the protective tariffs imposed on dumping exports also contributed to this result.
- ➔ In the EU (+0.2 %), the increase in steel production stagnated. Reasons for this development reasons to the effect of protective trade policy measures by the EU and USA. Nonetheless, it appears as though the

import crisis in the EU has not been overcome, as declining steel imports from China have been offset by disproportionate increases in imports from other countries, as a result of growing protectionist tendencies in the global steel industry, the relatively open EU steel market is threatened by further trade diversion effects.

- ➔ In Brazil, the steel industry again performed better (+2.5 %) than had been expected given the difficult macroeconomic situation in that country and the uncertain outcome of the Presidential elections. Although the biggest economy in Latin America experienced the deepest recession in the country's history in the last two years, steel production exhibited a countervailing development. However, there are justifiable doubts concerning the sustainability of this trend because economists have little hope that the Brazilian economy will recover anytime soon.

1.3 The markets for SKW Metallurgie's core products follow the lead of the steel industry

The development of markets for primary and secondary metallurgy products is essentially dependent on the development of produced steel volumes, especially for high-quality and higher-quality steel grades. The more steel is produced, the more primary and secondary metallurgy products are needed. Another factor influencing the quantities sold by SKW is the means by which steel is produced (blast furnace with primary metallurgy or electro-steel plant. A shift towards electro-steel plant production would have a greater impact on the primary metallurgy business (desulfurization). Such a shift can only be partly observed in the United States at the present time.

6. Report on opportunities and risks
7. Events after the reporting date
8. Comparison of forecasts made in the prior period with actual developments
9. Declaration according to Par.37wSec.5WpHG

3, Company and business developments

3.1. Revenues within expectations in the first three months of business year

Revenues of the SKW Metallurgie Group in the first nine months of the reporting period 2018, which started on 1 December 2017 due to the abbreviated financial year 2017, amounted EUR 213.1 million, 7,4% above the previous year (EUR 198.2 million); drivers have been the region of North America and Europe.

3.2. Competition burdens distinctly gross margin

Particularly in a raw materials-intensive business like that of the SKW Metallurgie Group, revenues can be influenced simply by changes in the cost of raw materials and by the corresponding adjustment of sales prices, even though the operating performance may not have changed, Therefore, the gross profit margin (gross margin) is a much more meaningful indicator, In the SKW Metallurgie Group, the gross profit margin (gross margin) is defined as the percentage of revenues represented by the difference between the total operating performance (sum of revenues, changes in inventory, and internal production capitalized) and the cost of materials, In the first nine months of this reporting period, the gross profit margin of 28,3% – calculated on the basis of a EUR 153.0 million cost of materials (PY: EUR 136.9 million) – was clearly littler than the prior-period figure of 31.7 %, This negative change is due to the massive pressure on prices in SKW's customer industries as well as the decline in some high-margin product lines, despite successful increases in efficiency, especially for standard products.

3.3. Other operating results shaped by SKW contributions related to the financial restructuring

In contrast to the previous year, other operating income was not affected by any one-off effects. Significant income resulted from foreign currency income in the amount of EUR 2.0 million (previous year: EUR 1.7 million). But, in the previous year, two special effects also determined this position: the sale of the impaired majority stake in SKW Tashi Metals and Alloys Pvt./Bhutan (Asset Recovery) and the 50% reduction of the pension commitment to the former CEO resolved by the Supervisory Board. At the time, these facts had a positive impact on other operating income at SKW of around EUR 3.9 million.

Other operating expenses particularly include variable, revenue-dependent cost components (such as shipping costs and sales commissions) in the operating Group companies, as well as legal and consulting expenses. Foreign currency effects of intragroup dealings caused negative foreign currency effects of EUR 3.3 million (PY: EUR 2.9 million).

Thanks to the optimization measures implemented as part of the ReMaKe program, the personnel expenses of EUR 25.3 million in the reporting period has been reduced by nearly 7.5 % compared to prior-year figure (EUR 27.4 million) despite an 6.9 % increase in the production quantity,

Interim Group Management Report

6. Report on opportunities and risks
7. Events after the reporting date
8. Comparison of forecasts made in the prior period with actual developments
9. Declaration according to Par. 37w Sec. 5WpHG

3.4. Adjusted EBITDA meets expectations: positive market momentum bolster results of ReMaKe measures

The stated EBITDA of the SKW Metallurgie Group for the first nine months of the business year amounted to EUR 6.2 million, which was considerably lower than the prior-period comparison figure (Q3-2017: EUR 10.1 million). However, the stated EBITDA is not a very useful indicator of the Group's operating performance in this period until it is adjusted for non-recurring effects, non-operating effects and foreign currency effects,

After adjusting for the non-recurring effects 2017 of the "Bhutan asset recovery" and the "settlement with former Executive Board members" in the amount of EUR 3,9 million, both of which are recognized in other operating income in 2017, as well as the non-recurring restructuring expenses (12/2017-08/2018: EUR 3.1 million; Q3-2017: EUR 2.6 million) and the unrealized currency effects included in other operating income and expenses (12/2017-08/2018: EUR -1.3 million; Q3-2017: EUR -1.2 million), the EBITDA for the first nine months of the business year 2018 came to EUR 10.6 million (Q3-2017: EUR 10.0 million).

Thus, this adjusted operating indicator is below the original full-year guidance of an adjusted EBITDA of approximately EUR 15 million; assuming a sustainably positive development of basic operating conditions, SKW continues to expect an increase in operating EBITDA while the performance is expected to stay on the current path (concerning consequences to the forecast see section 8 of this report)

3.5. Financial situation: financial restructuring program runs at full speed

In the first nine months, the balance sheet total of the SKW Metallurgie Group declined slightly by 2.4 %, from EUR 140.4 million to EUR 143.7

million, Cash and cash equivalents increased by EUR 3.4 million, from EUR 11.2 million to EUR 14.6 million.

Accumulated other comprehensive income declined by EUR 7.7 million, from EUR -73.8 million to EUR -81.5 million; the main reasons for this decrease were the negative consolidated net loss attributable to the majority shareholders of EUR -4.8 million. Furthermore, it has been influenced by non-cash foreign exchange rate fluctuations, the negative currency translation effect recognized in equity (EUR 3.6 million).

Further effects on the liability side of the balance sheet have been similar to the ones as at November 30, 2017 and were explained in the full-year reporting,

Gross financial debt and net financial debt are the key indicators used to analyze the financial position and cash flows of the SKW Metallurgie Group, Gross financial debt is defined as the sum of noncurrent and current financial liabilities. Net financial debt is defined as gross financial debt less cash and cash equivalents. The net financial debt of the SKW Metallurgie Group rose from EUR 79.2 million to EUR 80.1 million at August 31, 2018.

Besides the amount of net financial debt, the maturity is also significant: Both at the reporting date of August 31, 2018 and at the comparison date of November 30, 2017, the drawdowns under former and in last fall refinanced syndicated loan agreement, which represented the principal financing instrument for the Group's parent company and therefore parts of the Group as well, and the furnished guarantees are classified as "current" for technical reasons since the current insolvency plan, yet, has not been approved by the appropriate creditors meeting.

Interim Group Management Report

1. General economic conditions
2. Structure of the Group
3. **Company and business developments**
4. Segment report
5. Further optimization of the number of employees
6. Report on opportunities and risks
7. Events after the reporting date
8. Comparison of forecasts made in the prior period with actual developments
9. Declaration according to Par, 37w Sec, 5WpHG

3.6. Cash flow on even terms

The following table shows important items of the consolidated statement of cash flows:

EUR'000s	12/01/2017 08/31/2018	01/01- 09/30/2017
Consolidated net loss	-4.808	-3.009
Gross cash flow	1.596	1.221
Cash inflow/outflow from operating activities	6.178	-5.757
Cash inflow/outflow from investing activities	-7.190	-1.106
Cash inflow/outflow from financing activities	4.816	-4.275
Changes in Cash and cash equivalents ¹	3.332	-3.256
Cash and cash equivalents at end of period	14.566	11.538

Based on the negative consolidated net loss, the SKW Metallurgie Group even up gross cash flow (rounded EUR 4.7 million; Q3-2017: EUR 3.8 million) despite significant cash-effective, non-recurring restructuring expenses of EUR 3.1 million (PY: EUR 2.6 million). The cash flow from operating activities (also known as net cash flow) indicates the cash flow generated in operating activities during the period under consideration. It is calculated as the balance of gross cash flow and changes in working capital (in the broader sense, understood here to mean the sum of lines 11 to 20 of the cash flow statement, or the difference of the sub- total lines 10 and 20 of the cash flow statement). These changes in working capital (in the broader sense) amounted to EUR 4.6 million (PY: EUR -4.5 million) in the reporting period. The higher cash inflow from working capital resulted from the good business environment, optimized utilization of contracted sales and supply commitments and from negative currency effects.

In the first nine months of the financial year 2018, the changes in working capital (in both the narrower and the broader sense) remained within fluctuation margins that have been normal for the SKW Metallurgie Group to date. Nonetheless, SKW Metallurgie Group will continue to pursue the working capital optimization initiative that was begun in financial year 2015 in order to further reduce working capital (lower capital tie-up as a percentage of revenues) in the remainder of financial year 2018 and also to further reduce the range of variation, to the extent that it is not induced by corresponding revenue volatility.

The cash flow from investing activities is influenced by one-off effects in the first three months of the financial year 2018 as well as in prior year: Firstly, proceeds from the disposal of property, plant and equipment in connection with the divestment of ESM Group Inc,'s Specialty Magnesium business and the production facility in Saxonburg (Pennsylvania / USA) were recognized in December 2017; on the other hand, in the previous year, the agreed selling price from the sale of the equity investment in Bhutan of EUR 1,9 million was due in March, Adjusted for these effects, the cash outflow for investing activities in the reporting period of EUR -3.2 million is roughly at the level of the previous year (EUR -3.1 million), This amount comprises investments (essentially maintenance investments), which were nearly unchanged from the comparison figure and were also on the level of depreciation and amortization, The cash flows from operating activities and from investing activities yielded a free cash flow of EUR -1.0million in the reporting period (PY: EUR -6.9million),

9. Declaration according to Par, 37wSec, 5WpH

1. Including currency effects under cash and cash equivalents

4. Segment report

According to IFRS, segments are to be formed on the basis of the enterprise's operating divisions, as determined by the internal organization and reporting structure of the SKW Metallurgie Group. Therefore, the segment report has been aligned with the new, regionalized internal management system since the consolidated financial statements at December 31, 2015. This new segment report format is more transparent particularly with regard to regional market developments, the evaluation of the effects resulting from the ReMaKe continuous improvement program, and the evaluation of exchange rate effects,

The reporting segments have not changed since the full-year reporting 2017; therefore, they are called unchanged: "North America," "Europe and Asia," "South America," and "Other and Holding Company",

The results of the reportable segments in the reporting period are detailed in the following:

➔ In the "North America" segment, total revenues increased by 8.5 %, from EUR 96.3 million (Q3-2017) to EUR 104.5 million (Q3-2018). The corresponding segment EBITDA dropped by 14.0 %, from EUR 4.3 million (Q3-2017) to EUR 3.6 million (Q3-2018). This deviation is mainly due to the fact cored wire sector encountered above-average aggressive price competition, which had a negative impact on the gross margin and ultimately on the EBITDA.

➔ In the "Europe and Asia" segment, the total first three months' revenues of EUR 69.5 million were likewise significantly higher than the prior-year comparison figure (EUR 62.5 million). The corresponding segment EBITDA developed disproportional and below expectation due to an unfavorable product mix in the reporting period,

➔ The segment "South America" segment generated total revenues of EUR 17.5 million, which were 16.8 % lower than the comparison figure (Q3-2017: EUR 18.9 million). The EBITDA declined disproportionately from EUR 4.1 million (Q3-2017) to EUR 3.3 million (Q3-2018). This negative development has been budgeted since prior year performance was winged by extraordinary business opportunities and a better, higher margin product mix.

➔ The result of the "Other and Holding" segment is composed of the results of two operating companies, on the one hand, and the results of the Group parent company and other non-operating companies, on the other hand:

➔ The two operating companies SKW Quab Chemicals Inc. and SKW Stahl-Metallurgie GmbH generated total revenues of EUR 22.5 million in the first nine months of the business year (Q3-2017: EUR 22.4 million) and an EBITDA of EUR 1.1 million (Q3-2017: EUR 4.4 million).

➔ The Group parent company SKW Stahl-Metallurgie Holding AG and the other non-operating companies assigned to this segment do not generate revenues, by definition, and usually post a negative EBITDA. In the reporting period, EBITDA amounted to EUR -3.8 million and -2.9 million in the same period of prior year - after adjusting two special effects: Asset Recovery Bhutan (EUR 1,9 million) and the reduction in the pension commitment of the former CEO (EUR 2,0 million).

9. Declaration according to Par, 37wSec, 5WpHG

5. Further optimization of the number of employees

As always, well trained and highly motivated employees are an important prerequisite for the business success of the SKW Metallurgie Group. As a result of restructuring measures, optimization measures, and adjustments to reflect the current state of the steel industry, the worldwide number of employees at August 31, 2018 was 572, that being fewer than the number of 564 at September 30, 2017.

About 97% of employees work outside of Germany; most employees are full-time workers,

No employees were affected by short-time work schedules at the end of the reporting period,

8. Comparison of forecasts made in the prior period with actual developments
9. Declaration according to Par, 37wSec, 5WpHG

6. Report on opportunities and risks

The SKW Metallurgie Group attaches great importance to the continuous detection and evaluation of opportunities and risks, in order to take suitable measures to optimally exploit opportunities and limit risks. In 2018, the Group updated the risk inventory conducted and updated at November 30, 2017 in the form of quarterly risk reports. These updates did not lead to any significant changes or new risks compared to the 2017 Risk Report. Nonetheless, we wish to point out the following risks again:

Risks of debt financing

The financial situation of the SKW Metallurgie Group was stabilized initially in January 2015 with the signing of a syndicated loan agreement for up to EUR 86 million, with a term until the beginning of 2018. This syndicated loan agreement covers 100% (aside from overdraft facilities) of the external financing needs of SKW Stahl-Metallurgie Holding AG and part of the external financing needs of the SKW Metallurgie Group. As a result of the steel crisis that began in 2015, it was necessary to conclude supplementary agreements (particularly including waivers of termination rights) in view of the non-fulfillment of the financial covenants stipulated in the loan agreement. A standstill agreement concluded in the first quarter of 2017 confirmed that the syndicated loan agreement will still be available, subject only to customary market adjustments, until January 31, 2018. Concurrently with this agreement, the parties agreed on a fundamental financial restructuring of the SKW Metallurgie Group in order to assure the Group's financing also beyond January 31, 2018.

After purchasing the receivables under the syndicated loan agreement, Speyside S,à r,l, entered into a loan agreement ("Restructuring Loan Agreement") with the Company on December 14, 2017. The loan

agreement is for approx. EUR 35 million plus an amount that corresponds to the total interest accrued in the time from October 17, 2017 to the entry into effect of this loan agreement. This loan agreement is subject to the legal validity of the plan confirmation and the purchase of all new shares and thus 100% of the Company's shares by Speyside S,à r,l, as conditions precedent. Thanks to this loan agreement, the Company will dispose of sufficient liquidity during the term of the agreement, i.e, until December 31, 2020, to settle the liabilities expected to come due in this time (including the liabilities to the insolvency creditors to be satisfied during this time under the insolvency plan). Therefore, the implementation of this insolvency plan will assure the future financing of the Company.

Nonetheless, it must be pointed out that the implementation of any future plan is fraught with uncertainties. Parts of the planned financial restructuring measures depend on the cooperation of third parties (shareholders, other stakeholders and investors), who cannot be influenced by the SKW Stahl-Metallurgie Holding AG. In the event of a significant negative variance from the planned business performance and/or the unsuccessful implementation of operational measures under the ReMaKe program and/or a failure of the financial structuring plan or the inability to obtain financing to replace the syndicated loan agreement, the liquidity of the Company and the Group would no longer be assured. In this case, the going-concern status of the Company and the Group would be endangered. Therefore, the future going-concern status of the SKW Metallurgie Group and the parent company SKW Stahl-Metallurgie Holding AG is mainly dependent on the successful implementation of the insolvency plan. A foreseeable or actual failure of the insolvency plan would entail an extraordinarily high risk that the financing of the SKW Metallurgie Group and the parent company SKW Stahl-Metallurgie Holding

AG would no longer be assured, meaning that the transition of the Company to regular insolvency proceedings would be inevitable and thus the going-concern status of the Group would be endangered.

7. Events after the reporting date

Based on an authorization of the Higher Regional Court Munich (Oberlandesgericht München) according to sec. 122 para. 3 German Stock Corporation Act (Aktiengesetz), rendered on 5/14/2018, MCGM GmbH, Munich and La Muza Inversiones SICVAV, S.A., Madrid, Spain as shareholders of the Company, have convened a general meeting of the Company for Tuesday, 9/11/2018 at 10:00 a.m. at the Kaufmanns Casino, Odeonsplatz 6, entrance via Galeriestraße, 80539 Munich. Additionally, the agenda was amended by the supervisory board. The Executive Board, in consultation with the custodian, has issued an statement on the agenda items brought up the shareholders. By publication in the Federal Gazette on September 6, 2018 MCGM GmbH, Munich, and La Muza Inversiones SICAV, S.A., Madrid, Spain, have postponed this General Meeting to December 7, 2018.

No transactions and events of particular importance for the SKW Metallurgie Group became known after close of the reporting period on February 28, 2018 and before issuing this quarterly report,

8. Forecast report: Comparison of forecasts made in the prior period with actual developments

As usual, the Forecast Report for the year 2018, which was published in the 2017 Annual Report, referred to the full year 2018 and therefore did not include explicit statements concerning separate quarters of 2018. Subject to certain assumptions and definitions, the forecast called for revenues of approximately EUR 270 million and an adjusted EBITDA of approximately EUR 15 million in the core business for the full year 2018.

The actually reported values confirm the full-year forecasts made at the time insofar as the revenues generated in the reporting period were nearly proportionate to the full-year revenue forecast and the adjusted EBITDA generated in the first nine months of 2018 slightly exceeded the proportionate share of the seasonalized forecast amount.

The SKW Metallurgie Group is now set up in an operationally efficient manner and is therefore confident of being able to take advantage of opportunities in its core markets and improve its competitive position. Assuming a sustainably positive development of all basic operating conditions, the Company predicts that it will be able to achieve operating EBITDA close to the level of the guidance given for financial year 2018. Contrary to the optimistic view expressed in the first quarter of 2018, it has been confirmed that the achievement of the guidance by geo-political developments such as the trade war between the United States of America on the one hand and the People's Republic of China or the European Union on the other, and the economic uncertainties of the presidential elections in the core market of Brazil, the guidance for 2018 appeared to be extremely ambitious and suggests that it is more probable that the financial result for the year will probably be slightly higher than in the previous year.

To achieve this goal, the Executive Board of the SKW Metallurgie Group will continue to systematically implement the “ReMaKe” continuous improvement program, Key elements of this program include comprehensive efficiency enhancements, increased collaboration between individual Group entities to realize cross-selling effects, the further business performance in regional markets, but also new technology and application areas, The successes of this program are meant to offset and in some cases more than offset exogenous developments, particularly including the consequences of the steel crisis,

Notwithstanding the foregoing, it should be noted that the 2017 financial year has ended due to the termination of the current provisional insolvency proceedings in self-administration and the associated opening of the actual insolvency plan proceedings in own administration in an abbreviated financial year as at November 30, 2017, As similar fate will face the financial year 2018 unless the insolvency proceedings last less than 12 months; in such a case, an additional abbreviated financial year would have to be reported for 2018,

Segment report

EBITDA is the most important financial indicator for managing the operating segments; other information is applied to reconcile earnings before taxes to consolidated net income/loss.

The SKW Metallurgie Group manages its worldwide activities on the basis of geographical regions. The profit indicator by which the segments are managed is EBITDA, which accords with the consolidated financial statements. Other information is applied to reconcile the earnings before taxes with consolidated net income/loss. All product groups and services of the SKW portfolio are offered in the segments, as a general rule; depending on the industry circumstances and market needs, both primary and secondary metallurgy products are distributed.

North America

All business activities managed from North America are bundled within the North America segment. A Chinese subsidiary that supplies products to the U.S. companies is also assigned to this segment.

Europe and Asia

This segment comprises the jointly managed activities in the European and Asian markets; they are coordinated by the French subsidiary.

South America

This segment comprises the business activities in Latin America; they are coordinated by the Brazilian subsidiary.

Other operating segments

The other operating activities that do not belong to the Group's core business are bundled within this segment. This segment is mainly characterized by the activity of SKW Quab Chemicals Inc., which produces and distributes special chemical reagents (referred to as cationizing reagents) in more than 40 countries. Furthermore, SKW Stahl-Metallurgie GmbH is one of them; it is a trading unit for powders and granules, primarily in the European market.

Other non-operating segments and holding

This segment comprises the non-operating activities beyond the core business that do not generate revenues with third parties, as well as the expenses for the Group's headquarters and the income it earns from providing services to the subsidiaries.

Consolidation

The consolidation of business dealings between the segments is presented in the consolidation column. The revenues generated between the segments are priced at intercompany transfer prices, which are mainly based on the resale price method.

Segment assets

Segment assets correspond to all the assets of the respective segment; shares in associated companies are presented separately. Segment liabilities correspond to all liabilities of the respective segment.

To clarify the presentation of the segment report, the segments have been divided into operating and non-operating segments in this interim report.

The activities of the segments in the reporting period are presented in the table below:

11/2017-08/2018 in EUR'000	North America	Europe and Asia	South America	Other operating segments	Other non-operating segments and holding	Consolidation	Group
Revenues							
External revenues	104,297	69,165	17,494	22,155	0	0	213,111

Disclaimer and Notes

This report contains statements about forthcoming developments that are based on currently available information and that entail risks and uncertainties. This may result in deviations between the actual situation in the future and the forward-looking statements. These risks and uncertainties include, for example, unpredictable changes in political and economic conditions, particularly in the steel and paper industry, the competitive situation, interest and currency risks, technological development as well as other risks and unexpected circumstances. SKW Stahl-Metallurgie Holding AG, Munich (Germany) and its group companies do not accept any responsibility to update such forward-looking statements.

When reference is made in this report to groups of people who factually or potentially include both genders (such as “shareholders” or “employees”) or when gender neutral references are made to a single person (such as “the responsible officer”), the report usually only quotes one gender. This is solely done in the interest of improved readability (translator’s note: in most instances this only applies to the German original, since there are no distinct terms in English for male or female shareholders, experts, employees, etc.),

SKW Stahl-Metallurgie Holding AG’s group brand that is used externally is “SKW Metallurgie”. For this reason “SKW Metallurgie” and “SKW Metallurgie Group” are used in this report.

Names such as “SKW Metallurgie”, “Quab” and “SDAX” that are used in this report may be registered trademarks whose use by third parties for their purposes could infringe the rights of the proprietors.

This is the English translation of the German original of this report; in case of any discrepancies the German version prevails. In addition, for technical reasons (e.g., the conversion of electronic formats) there may be differences between the accounting documents included in this report and those submitted to the electronic company register.

For several cities quoted in this report, different names and/or transcriptions into the Latin alphabet are in use. The use of a certain name or transcription is for information only and is not intended to imply any political statement. Maps that may be contained in this report are for illustration only and are not intended to induce any political statements, such as the legitimacy of borders. In this report, the term “China” refers to the PR of China without its two Special Administrative Regions. In this report, the term “Hong Kong” refers to the PR of China’s Special Administrative Region of Hong Kong.

References to acts of law (e.g. the Joint Stock Companies Act) without any further information relate to the German acts of law in their respective applicable version.

This report was published in October 2018 and is available at www.skw-steel.com to download free of charge
